ADCCTL

Содержание

1	Запуск программы.....	2
1.1	Установить утилиту adcctl.....	2
1.2	В директории с установленной утилитой запустить консоль добавив к пути cmd в адресной строке.....	3
1.3	Проверить подключение устройства к ПК введя команду adcctl.exe.....	3
1.4	Чтобы вызвать меню всех доступных команд – прописать в консоли adcctl help.	3
2	Установка статического IP-адреса.....	4
2.1	Чтобы установить статический IP устройства - в консоли прописать поочередно команды:	4

1 Запуск программы

1.1 Установить утилиту adcctl.

 adcctl-0.3.1 build 5-setup	10.03.2025 10:24	Приложение	16 987 КБ
 *7 (831-30) 4-94-44		g.ctab.pro	2

1.2 В директории с установленной утилитой запустить консоль добавив к пути cmd в адресной строке.

1.3 Проверить подключение устройства к ПК введя команду adcctl.exe

```
Microsoft Windows [Version 10.0.19045.5737]
(c) Корпорация Майкрософт (Microsoft Corporation). Все права защищены.

C:\Program Files (x86)\adcctl>adcctl.exe
ADCCTL by GTLAB ver: 0.3.1 2024
For help message use: adcctl help

Discover mode
sn: 25003 model: 12 address "::ffff:192.168.0.101"
Found: 1 [ "25003" ]

C:\Program Files (x86)\adcctl>_
```

1.4 Чтобы вызвать меню всех доступных команд – прописать в консоли adcctl help.

```
Microsoft Windows [Version 10.0.19045.6093]
(c) Корпорация Майкрософт (Microsoft Corporation). Все права защищены.

C:\Program Files (x86)\adcctl>adcctl help
ADCCTL by GTLAB ver: 0.3.3 2025
For help message use: adcctl help

Usage: adcctl [SN] [COMMAND] [OPTIONS]

Call ADCCTL without any options emits DISCOVER mode.

SN - serial number of device

COMMANDS:
setStaticIP          OPTIONS contains new IP-address
setStaticGate        OPTIONS contains new IP-address
setStaticMask        OPTIONS contains new network mask
setDefaultIP         OPTIONS contains new IP-address
setDefaultGate       OPTIONS contains new IP-address
setDefaultMask       OPTIONS contains new network mask
setNetworkMode       OPTIONS contains "dhcp" or "static"
connect              ONLINE mode for DEBUG purposes
save                 saving network configuration and automatically reboot ADC
reboot              reboot ADC
show                 request ADC configuration
flash                OPTIONS contains PATH to FIRMWARE_FILE

syncTime             sync device time with this machine

setfww               SN contains VERSION and OPTIONS contains PATH to FIRMWARE_FILE

EXAMPLE. To setup new static network configuration use this steps:
adcctl 23001 setStaticIP 192.168.0.103
adcctl 23001 setStaticGate 192.168.0.1
adcctl 23001 setStaticMask 255.255.255.0
adcctl 23001 setNetworkMode static
adcctl 23001 save
```

2 Установка статического IP-адреса

2.1 Чтобы установить статический IP устройства - в консоли прописать поочередно команды:

- adcctl (заводской номер устройства) setStaticIP 192.168.0.101

```
C:\Program Files (x86)\adcctl>adcctl 25003 setStaticIP 192.168.0.101
ADCCTL by GTLAB ver: 0.3.1 2024
For help message use: adcctl help

Config mode
setStaticIP: "25003" : "192.168.0.101"
adc created: 25003
ADC class start 25003
Found ADC: 25003 on IP: "192.168.0.103"
"09:53:16" single adc connected
ADC 25003 Register read error: 102

Finished
```

 Перед началом работы необходимо разрешить все входящие UDP пакеты на порт 7000 в настройках брандмауэра Windows. Также в случае, если на компьютер установлена виртуальная машина, отключить виртуальный сетевой адаптер.

Решаем задачи и реализуем идеи
безопасного будущего промышленности
